Homeopathic Prevention and Treatment of Infectious Contagious Disease

In order to advocate for the non-use of vaccinations we must have a viable option for the treatment of infectious contagious disease. Homeopathy is a complete system of medicine with historical and present day applications for the treatment and prevention of infectious contagious disease. During this weekend curriculum we will take up the study of homeopathic philosophy with respect to acute disease along with homeopathic prevention and treatment of specific diseases.

Learning Objectives:

- The study of susceptibility and acute vs chronic disease
- The study of dissimilar diseases according to the Organon of Medicine
- Homeopathic philosophy with regards to prevention and treatment
- The Immune System and Vaccine injury
- Study into various infectious contagious diseases; symptomology; homeopathic prevention and treatment, applicable homeopathic remedies, potency, prognosis, and case management
- Homeoprophylaxis programs

Homeopathic Philosophy

- Understanding Vaccinosis
- Homeopathic prophylaxis
- Genus Epidemicus

The Immune System

Vaccine Injury

Cases Studies

Therapeutics:

Homeoprophylaxis

Exanthematic diseases

- Scarlet fever, Roseola, Measles and German measles, Chicken pox, Small pox

Diseases affecting the nervous system

- Tetanus, Rabies, Polio, Diphtheria, Whooping cough

Tropical diseases

- Yellow fever, Dengue fever, Malaria, Typhoid, Cholera

Glandular diseases and diseases of the lung

- Influenza, Mono, Mumps, Pneumonia, Tuberculosis

Outcome:

Students will walk away from the class having a thorough understanding of the pathological process of various infectious contagious diseases, sufficient materia medica knowledge to effectively treat the diseases as they arise, and an intermediate understanding of the treatment of vaccine injury with homeopathy.

Fees:

All fees must be paid prior to class

Must pre-register by

No refunds after class commences

Suggested Text: Vaccine Free

Prevention and Treatment of Infectious

Contagious Disease with Homeopathy

By Kate Birch RSHom(NA), CCH, CMT

Books may be ordered prior to class

About the Instructor: Kate Birch, RS Hom(NA), CHC, has been practicing and teaching homeopathy since 1994. She is the recent author of Vaccine Free Prevention and Treatment of Infectious Contagious Disease with Homeopathy.

Kate has been lecturing internationally and locally to homeopaths and lay persons on the promotion of homeopathy for the prevention and treatment of infectious contagious disease and vaccine injury.

“It is my vision to see homeopathic clinics established around the world disseminating homeopathic remedies to local communities for the prevention of infectious contagious disease. To these ends, I believe homeopaths around the world must be well versed in the subject matter to manage these clinics and to establish the rightful place of homeopathy in this area of public health.”

Kate Birch
