Short biography

**Kate Birch, RSHom (NA), CCH, CMT
Minneapolis (USA)**

Homeopath, Massage Therapist and Doula

Homeopathy: Classical Homeopathy for the whole family; pediatrics, infections, injury and trauma, developmental problems, learning disorders, mental and emotional issues, depression, anxiety, sexual abuse, woman's issues, digestive complaints, neurological disorders, general health management etc.

Diet and nutrition: Specifically in areas of toxicity, fasting and cleansing, dietary recommendations relating to candida, hormonal imbalances, and digestive problems. A whole foods approach to balance, tonify and nourish organ systems.

Therapeutic massage: Deep tissue is my forte with and emphasis on neuromuscular work for restructuring the neurological imprint of holding patterns in the body. Work focused on rehab from auto injuries, freeing postural limitations and oriental style techniques aimed at toning/detoxing specific organ systems through the meridian channels. Therapeutic massage for relaxation and stress management.

Energy work: This is a catchall term for the work I do with the energetic body. Having its roots in Healing Touch tm Shamanic style healing and intuitive guidance, this work specifically is aimed at opening and channeling the energy flows in the system, releasing blocked areas from the energy field and psychic surgery. This work can be purely relaxation or can be

directed to realigning the auric system after physical or emotional trauma, shock, or medication and drug use. With the use of relaxation techniques and hands on to specific areas, an individual's pain is explored from this life or past lives, as to how it came to be, what mental and emotional conditions are stored there, from here the resolve and reintegration of the information gathered takes place.

Doula services: Physical and emotional support during labor and delivery. With the use of homeopathic remedies, massage techniques and presence of being my intention is to assist the mother in what ever way necessary, for support through her birthing process.

Since 1990 Kate has over 1900 hours in homeopathic and clinical education, with an additional 700 hours in massage and bodywork training. She has been providing Doula services since 2001. She has been teaching homeopathy in lecture and classroom settings since 1994. Kate has a general practice for men, women and children for all health concerns from infancy throughout life.

Outline for weekend curriculum

Homeopathic Prevention and Treatment of Infectious Contagious Disease

Saturday, 12.03.2011

9:00-11:00am

Introduction: survey of international advancements in Homeopathic prevention

Homeopathic Philosophy

- Acute disease vs chronic disease, introduction of miasms

- Dissimilar diseases

- Purpose of acute disease

- Homeopathic prophylaxis

 - Genus Epidemicus

 - Susceptibility

- Potency selection

- Use of nosodes

Each of the following sections includes a description of the pathogenesis of the diseases, current vaccinations and their side-effects, homeopathic prevention and treatment, materia medica, posology, prognosis and sample cases.

Break 11:00-11:20

11:30am-1:00pm

Diseases affecting the nervous system

- Tetanus, Rabies, Polio, Diphtheria, Whooping cough

Lunch 1:00-2:15pm

2:30-5:30pm Mid-afternoon break 4:00 ish

Exanthematic diseases

- Scarlet fever, Roseola,

Break 11:00-11:20

11:30am-1:00pm

Dissimilar disease (Organon)

Three possible reactions

History of Vaccination

Understanding Vaccinosis

How Vaccines Affect your Child's Immune System A study into the history of vaccination and the relevance of current day vaccination schedules

- An overview of susceptibility of the individual, how vaccinations affect susceptibility, and the bell curve of disease through populations
- Vaccinations in the infant's developing immune system
- If parents decide to not vaccinate what other choices do they need to make to support that decision

Lunch 1:00-2:15pm

2:30- 3:30 The Immune System, Vaccine injury, never been well since, Iatrogenic diseases, otitis media, allergies, asthma, autoimmune conditions Autism, behavioral disorders,

Homeopathic treatment of vaccine injury, Cases

Short break

3:45-4:30

An introduction to a 4-year self administered Homeopathic prophylaxis program

4:30-5:00 questions and discussion

Monday, 14.03.2011.

9am-4pm

Case taking and analysis

3 cases of children with vaccine injury, two cases in am and one in pm. With analysis to follow. Students may take the 2nd and 3rd cases, with supervision. Cases should come from within community without previous homeopathic care..

9:00 first case (1-5 hours)

10:30-11 discussion/analysis

Break

11:15 Case 2
Lunch 12:45-2
2:pm third case
3:30 analysis of case 2 and 3

CONDITIONS

- Location: Belgrade, Serbia, Požeška 83a (Banovo brdo)
- e-mail: simillimumbgd@gmail.com
